#### CLUB CALENDAR

**June**

**06 - Meeting,  
Blueberry Twist Restaurant, Oroville**

**11 - Club Shoot**

**CMA Father's Day Invitational**

#### Presidents Message

It has come to my attention that the work parties are attended by only a select few. I can understand that there are times when a person cannot attend but I cannot understand when a person does not attend any work party or meeting. I have been in other types of organizations including some in the military and some in civilian life that had the same problems. Everyone would like to belong but very few wanted to do the work. Over a period of time the dedicated few get tired of doing the work or get to old to really help out and stop coming to meetings or work parties and the organization dies on the vine for lack or participation from its members. The final straw is the door closes and the unit is disbanded. All for lack of participation for what ever reason a person can come up with for not doing their share. I also know that being a new member you sometimes feel like there is a "Click" in the organization and you don't think you fit in. You are wrong. The so called "Click" would love to have you as a member but neither of the two can remember to ask one another to join in.

Its our Club and we need to make an attempt to improve our relationship with all the members and try to at least share the work party load. If we don't, one day in the near future the club will be gone. Then you will have to find another beautiful place to do your Archery.

Watachie Don Harris

This month's issue compiled and edited by Kim Laurence

Jerry Johnson

Scott Barnum

CMA members Jerry Johnson and Scott Barnum take two nice gobblers with their compound bows Saturday, May 6, 2006. First gobbler taken by Scott in the early morning, then Jerry took his gobbler three hours later, both from the same set-up.

### **Trivia...Trivia...Trivia...**

True or False:

The different color feather on an arrow is called the index.

(See bottom right corner of this page for the answer)

### **Some Technical Info:**

Have you been wondering is the abbreviation I.B.O. represents?

I.B.O. is the abbreviation for International Bowhunters Association and this is the definition:

Under this standard the bow being tested will have a maximum pull weight of 70lbs. The arrow will have a grain weight of 350(5 grains of arrow weight per pound of bow weight). The draw length will be set at 30 inches. The chronograph used for measuring the speed will be placed at point blank range for testing.

(Answer to trivia question: True)
